The paperless office never seems to get any closer and most of us handle a variety of documents in the course of our working day.

In addition to traditional stand-mounted and beside-the-screen designs, our in-line document holders fit in front of the monitor. These are best suited to “hunt and peck” (non touch-type) keyboard users who need to look between screen and keyboard.

If you also need to write on the documents you are looking at, consider the FlexDesk, which moves from document holder to writing slope position in a moment.
